## Dr. Rob Veis

Author, educator, celebrated lecturer, impassioned leader...Dr. Rob Veis is CEO of The Appliance Therapy Group -- world's leading manufacturer/provider of orthodontic and dental appliances; educational programs; and associated products and services to the dental community.

Author of numerous scientific articles and publications currently considered to be authoritative sources of information within the dental community, he is an internationally renowned thought leader on the topics of Dental Sleep Medicine, Orthodontics for the General Practice and Appliance Therapy – and has served on the faculties of USC (13 years) and The Las Vegas Institute for Advanced Dental Studies. Dr. Veis has infused Appliance Therapy Group with his own brand of energetic leadership, enduring spirit and singular vision over the years, while continuing to practice General Dentistry in the greater Los Angeles area.

### Course Objectives and Benefits

**Simple, early interceptive treatment can prevent serious orthodontic complications and the occurrence of habit-driven malocclusions.**

**In this course of study:**

**Interceptive Orthodontics for Children** – Learn the secrets and appliance-therapy solutions for simple space maintenance, correcting Anterior and Posterior Crossbites and eliminating destructive oral habits.

**Adult Minor Tooth Movement** – From anterior crowding correction to molar uprighting to improving periodontal defects and saving "unrestorable" teeth, you'll learn how simple appliance therapy can deliver dramatic aesthetic results.

## Dr Salehani

Dr. Salehani is a board certified oral and maxillofacial surgeon. He received his undergraduate degree in Biochemistry with honors and his dental degree with honors from State University of New York at Stony Brook. He completed his [Oral and Maxillofacial Surgery](#) training at Long Island Jewish Medical Center. In addition to receiving a diversified maxillofacial training at LIJMC, he also earned a medical degree at Stony Brook School of Medicine. Then he went on to complete an internship in general surgery at Stony Brook University Hospital, where he was trained to manage major trauma cases. Dr. Salehani practices a full scope of oral and maxillofacial surgery including dentoalveolar surgery, facial reconstruction ([trauma](#) or [pathology](#)), [orthognathic \(corrective jaw surgery\)](#), [cleft lip and palate](#), [dental implant](#), and [TMJ surgery](#). He also participates as a faculty member in residents' and students' education at the UCLA medical center

### Synopsis

Restoration of dentition in the esthetic zone can be challenging in certain cases. A thorough diagnostic workup should include an interdisciplinary approach to ensure optimal treatment. Soft and hard tissue maintenance in the anterior esthetic zone is paramount to achieve a satisfactory result. In this lecture, Dr. Salehani will review treatment planning for restoration of implants in the esthetic zone. Also, different approaches to restoration of implants in this area will be presented.
